

FirstNet™

is reinventing how first responders share information, by

making mobile data mission critical.

Created by Congress in 2012 to address several unmet recommendations of the **9/11 Commission Report**, FirstNet is the federal authority responsible for the deployment, operation, and maintenance of the **first high-speed, nationwide wireless broadband network dedicated to public safety.**

FirstNet's goals are to provide **priority** when you need it, **resiliency** in the face of disaster, and **coverage** wherever you operate.

How the **National Public Safety Broadband Network** will help you:

***"Take the network along"** in remote destinations*

*Maintain **local control** by incident commanders in times of emergency*

*Get **data in real-time** on floor plans, vitals, incident commands, and person locations*

***Continue uninterrupted operations** when wireless carriers are overwhelmed*
